

Visioning

Pedestrian bridge across Kewalo basin should be a priority. Board and bicycle storage at Look Lab or Net Shed would be great. Look u the nonprofit bike station. They are low cost consultants.

Pathway for Ala Moana Park through Kewalo then up through the Waterfront Park – as close to the water as possible and as much workforce housing as possible until housing as required and retail and lots of public space for exercising and biking and rollerblades, walking, eating, clear surf access...

1. Learn and play land use (HCR-30, HD1, SD1)
2. Open space
3. Low density
4. Building heights no higher than coconut trees
5. Educational functions]
6. Entertainment Functions] Learn & Play Vision
7. Local Commercial Functions]
 - a. "Made-In-Hawaii" Products, Arts, Crafts, etc.

An exciting and dynamic destination attracting residents and visitors day and night. Development that respects the hearty and natural resources of the area, and compliments the recreational, educational, and cultural activities taking place in the area.

Emphasis on keiki.

Park space/access/less concrete/farmers/fish market – in the "old" sense/pedestrian/bike friendly.

Performing Art facility – non-profit arts group, gathering place, Hawaiian sense of place.

Parks and open space for all 36 acres of Kaka`ako Makai.

- Education of public to the marine environment and research
- Open space

Is the major gateway to the world reflecting Hawaiian tradition and heritage, giving all the opportunity to perpetuate the spirit of Hawai`i?

- Open spaces (no big buildings or elevated parking structures)
- Lei of green that includes major park space in Kaka`ako makai

Don't forget about the value of Kewalo Marine Lab that provides research, training and service to the community on marine sustainability and conservation

Park along the entire shoreline of Kaka`ako Makai. This is to ensure access to the ocean. Also, whatever businesses are built there engage the local people of Hawai`i – their customs, traditions, and way of life.

Create a sense of place that welcomes folks from all walks of life...Someplace that is INclusionary and that recognizes Kaka`ako's history as a cosmopolitan neighborhood. Also refrain from the gentrification that can easily result from so-called revitalization.

VISION TERMS
(from index card)

PUBLIC USE

PUBLIC INTEREST

RECREATIONAL, CULTURAL and EDUCATIONAL

Expanded shoreline park with passive recreational, Hawaiian cultural and educational public uses in the public interest for the greater good of present and future generations.

MORE WORDS FOR VISIONING

- Excellence
- Sustainability
- Accessibility
- Ecological Integrity
- Public Well Being
- Connectivity
- Restoration
- Authenticity
- Celebration
- Partnerships
- Community Based

One more vision:

Letting people live on the makai side again--both workforce and market.

A plan that was sustainable in that it wouldn't require a subsidy from the state.

Of a plan that had a value of urban beauty that would complement Hawaii's and this area's natural beauty.
